Notice
Tung Chung Line Extension
Tung Chung West Section Tunnelling Works
Delivery Arrangements for Tunnel Boring Machine

To take forward the construction of the Tung Chung West section tunnel for the MTR Tung Chung Line Extension project while minimizing the impact on the community, the bored tunnel method will be used to construct the Tunnel. A huge tunnel boring machine (TBM) has been split into 16 parts which were delivered and stored temporarily at the Tung Chung East barging point. The project team will transport the components by a fleet of trucks over not more than 12 nights in the early hours (from 1am to 5am) between Q4 this year and Q2 2025 (public holiday excluded). The fleet will travel through Yi Tung Road, Yu Tung Road and Shun Tung Road to the TBM shaft works site between the two phases of Tung Chung Crescent. (Please refer to the attachment for details.) The first delivery will be arranged on 21 November 2024.

Please note that it is not possible to conduct the delivery during the daytime hours due to the need for a brief occupation of main traffic roads. Construction Noise Permit for the aforementioned delivery works has been granted by the Environmental Protection Department. Please be assured that the delivery will be carried out as quickly as possible with due regard to the noise impact which may result, the contractor will adopt appropriate noise mitigation measures such as speed limit control of vehicles to minimize the impact on the community. We apologize for any inconvenience that this may cause you. For enquiries, please contact our Senior Engineer Mr. Lo at 6352 2812 or the MTR Project Hotline at 2993 3333.

Yours sincerely,

Kenneth LAU

Senior Construction Manager
