23 February 2026

Tung Chung East Station of Tung Chung Line Extension Topped Out

The MTR Corporation is taking forward six new railway projects. Among them, Tung Chung East Station[#] of the Tung Chung Line Extension is progressing on key works as planned. With civil works of the station substantially completed, the Corporation held a topping-out ceremony today (23 February 2026), marking the full commencement of electrical and mechanical (E&M) works.

The ceremony was officiated by Ms Jeny Yeung, Chief Executive Officer of MTR Corporation; Mr Carl Devlin, Capital Works Director of MTR Corporation; Ms Amy Wong, Deputy Secretary for Transport and Logistics of the Transport and Logistics Bureau of HKSAR Government; Mr Eddie Leung, Principal Government Engineer/Railway Development of the Highways Department of HKSAR Government, along with other officiating guests at Tung Chung East station, where they witnessed the project reach a new milestone.

“MTR connects communities and builds for the future through new railway projects. The project team’s effective collaboration has steadily advanced the Tung Chung Line Extension to enhance the railway network in North Lantau. Upon completion and commissioning, the new station will serve the increasing population in the Tung Chung East New Development Area in future, providing an important transport facility to foster community development,” said Ms Jeny Yeung, Chief Executive Officer at the ceremony.

In addition to the main structural works, the Tung Chung East Station project also involves the construction and integration of railway systems. The project team has leveraged Building Information Modelling (BIM) technology to plan and manage the work process more effectively and adopted precast concrete elements in the main structural works to improve construction efficiency. With civil works substantially completed, interior fitting-out and E&M installation are now commencing progressively at the station.

-more-

Meanwhile, the major track diversion works connecting to Tung Chung East Station are also progressing as planned. Two critical turnout installation works were completed in late 2024 and April 2025, respectively. Following this, track connection works and overhead line energisation for the new Hong Kong-bound track have been completed. Dynamic train testing is currently underway to prepare for train operations on the new track. Subsequently, the remaining two critical turnout installation works for the Tung Chung-bound track will be carried out.

The Corporation is committed to completing this project on target in 2029 to serve residents and cope with the future development of Hong Kong.

-End-

The station name is a working title only.

About MTR Corporation

To Keep Cities Moving, MTR makes encounters happen and rendezvous for a more connected tomorrow. As a recognised world-class operator of sustainable rail transport services, we are a leader in safety, reliability, customer service and efficiency.

MTR has extensive end-to-end railway expertise with over 45 years of railway projects experience from design to planning and construction through to commissioning, maintenance and operations. Going beyond railway delivery and operation, MTR also creates and manages dynamic communities around its network through seamless integration of rail, commercial and property development.

With more than 50,000 dedicated staff*, MTR carries over 10 million passenger journeys worldwide every weekday in Hong Kong, Mainland China and beyond. Together, we Go Smart and Go Beyond.
